COMPANY PROFILE

Cultivating a greener future, since 2004.

A specialist nursery and specimen-tree supplier — providing documented, design-grade specimens to landscape architects, developers, and estates across the UAE and Gulf.

NURSERY · TRADING · EXPORT · IMPORTING

ABU DHABI, UAE

01 WHO WE ARE

Rooted in Abu Dhabi, growing since 2004.

Pheladelfia Agricultural is a specialist nursery and specimen-tree supplier. Established in 2004, our farm spans over 1.5 million square feet in Al Ajban, Abu Dhabi — where plants and trees are propagated and grown on to specimen sizes.

We do not supply commodity planting. Every species and size class is selected for design-application value — measured, photographed, and documented to a standard that landscape architects and design-led developers can specify with confidence.

With mass-production capability, deep species range, and a skilled team, we serve demanding project timelines across the UAE and Gulf — from a single protagonist specimen to a full planting schedule.

02 OUR PURPOSE

What we stand for.

VISION

To create a *greener future for all*, using our expertise and experience to introduce innovative standards of horticulture and trading that bring new vibrancy to the green environment.

MISSION

To be a leading, professional nursery corporation — implementing plans of *unrepresented quality standards* with innovative designs at the most competitive cost.

Integrity

We conduct our business with honesty in every dealing and relationship.

Sustainability

We are committed to protecting the environment through everything we grow.

Quality

We deliver top-quality plants, products, and services, every time.

Innovation

We stay at the forefront of industry advancements and techniques.

03 OUR PRODUCTS

What we supply.

An extensive catalogue of high-quality horticultural products — expertly cultivated to thrive in the UAE climate — for every landscaping and gardening need.

Trees

Native & exotic varieties

A diverse collection of shade and ornamental trees, expertly grown to thrive in the UAE climate — the cornerstone of our nursery.

Palms

Date & fan palms

From majestic date palms to elegant fan palms — a touch of tropical paradise for any landscape.

Cactus

Arid & sculptural

Distinctive, resilient species suited to Abu Dhabi's arid climate — minimal water, maximum character.

04 OUR SPECIALTY

Specimen trees & rare forms.

Our focus is mature specimen trees and architectural plants — selected for character, scale, and presence, and grown on to landscape-ready sizes.

Olive Trees

Olea europaea

07 WHAT WE DO

Our services.

From sourcing and quality control to logistics, import, and export — we manage the full horticultural supply chain so you receive the right plants, in the right condition, on time.

Plant Sourcing

We connect buyers and sellers across the plant industry — our field team constantly visits nurseries, updating stock, prices, and availability for everything you need.

Exporting

We export high-quality plants, trees, and landscaping materials to clients worldwide, bringing green beauty to every corner of the globe.

Importing

We import specialised plant species and materials to enrich our offering and meet diverse client requirements.

Quality Assurance

Rigorous quality control runs through cultivation and landscaping — we work only with trusted nurseries and inspect every plant before delivery.

Centralized Purchasing

Consolidated procurement that significantly enhances the efficiency and effectiveness of your buying process.

Logistics

Plants delivered on time and in the condition expected — because receiving them when you need them is critical to your business.

The full horticultural supply chain, managed end to end.

08 OUR DIFFERENCE

Why landscape professionals choose us.

- 01 **Documented provenance**

Every specimen comes with a measured record and a photography pack — three angles, scale reference, high-resolution — within 48 hours.
- 02 **Curated, not commodity**

Species and size classes selected for design-application value — chosen for spatial role, never for price convenience.
- 03 **Transplanting protocol**

Large specimens move under documented method and monitored establishment, backed by a two-year warranty.
- 04 **Grown to specimen size**

Our own 1.5M ft² farm propagates and grows plants on to the mature sizes design projects demand.
- 05 **Ecological depth**

40%+ UAE native and naturalised species — ADM and Estidama aligned — for credible ecological specification.
- 06 **Built for designers**

Site visits, sample photography, and specification-ready documentation for landscape architects and design-led contractors.

09 CLIENTS & APPROVALS

An approved supplier to the region's leading names.

Pheladelfia is a registered and approved supplier to leading developers, government entities, and consultants across the UAE and the Kingdom of Saudi Arabia.

REGIONAL REACH

Pheladelfia has supplied premium specimen trees, botanical assets, palms, and horticultural solutions to projects across the region — a platform that extends well beyond our Abu Dhabi operating base.

United Arab Emirates | Saudi Arabia | Jordan | Qatar | Bahrain

10 GLOBAL SOURCING NETWORK

Sourced from the world's finest growing regions.

Beyond our own cultivation, we select specimen-grade material at origin across three continents — consolidating every shipment into our Ajban nursery for inspection, acclimatisation, and supply across the Gulf.

MEDITERRANEAN & EUROPE	GCC & LEVANT	ASIA
Spain Italy Netherlands Ancient olives, ornamental specimens, and field-grown stock.	Saudi Arabia Jordan Egypt Qatar Bahrain Oman Palms, regional natives, and acclimatised material.	China Thailand Vietnam Tropical specimens and architectural plants.

Consolidated at Ajban, Abu Dhabi

Every shipment is received at our 1.5 million ft² nursery, inspected and acclimatised to UAE conditions, then supplied across the Emirates and wider Gulf.

11 OUR PROCESS

From enquiry to planting.

I Enquiry & requirements

Share your plant list, sizes, and quantities. We review them against our nursery stock and sourcing network.

2 Sourcing & availability

Our field team checks prices and availability — drawing on our own farm and trusted nurseries at origin.

3 Quality control

Every plant is inspected before delivery, ensuring high standards thanks to our presence at origin.

4 Logistics

We coordinate transport so your plants arrive on time and in the expected good condition.

5 Delivery & support

Delivery to site, with the reliability and service standard your project schedule depends on.

12 CERTIFICATIONS & LICENSES

Certified, licensed and compliant.

Pheladelfia Agricultural operates to internationally recognised management standards and holds every licence and registration required to cultivate, trade, import, and export across the UAE and GCC.
